I cannot think of any time in the history of our nation when education—especially for middle-class workers—has been more critical to the survival of our cities and our communities. We need to further educate our workers so they are well informed and highly skilled. We need them as leaders in government at every level, and in the institutions that fight for economic opportunity and social justice for everyone. In partnership with the CUNY School of Labor and Urban Studies, CWA Local 1180 offers the Urban Leadership Program, designed to promote an enlightened and progressive approach to city governance. Along with other political and social initiatives developed by our union, the Urban Leadership Program gives 1180 members the tools they need to advance in public service careers and become strong civic leaders who will address the needs of working-class New Yorkers and our underserved communities in our City and State.
